This is a header

basic formatting *itatlics* and **bold** is supported. This *can be **nnested** like* this.

What this notebook shows

1. How to get started with Jupyter Notebooks
2. How to execute code
3. How to add markdown
4. Other stuff..

```
In [ ]: name = "Peter2"
```

The cells are run in the number order they appear next to the [].

Add code from top to bottom to make sure the execution order is correct.

If you get mixed up , you can **Run All** command under the Cell tab

```
In [ ]: name
```

Supports bash commands

use the **!** to prefix the command

```
In [ ]: !pip list
```

Support magic commands

Use the **%** to prefix the command. to get the list of commands use **%lsmagic**

```
In [ ]: %lsmagic
```

```
In [ ]: %pwd
```

```
In [ ]: %ls
```

```
In [ ]: ls
```
